

HOSPITAL ENVIRONMENT MAKES THE DIFFERENCE!

... all external surroundings and influences in the hospital comprise the patient's environment.

RESEARCH

EDUCATION

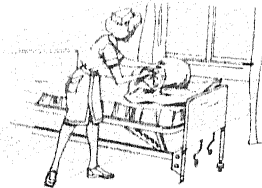

The hospital environment assumes increasingly greater significance to those responsible for reducing patient infections and improving personnel safety. Better information through research, wider distribution of information through education, and direct application of information through consultation are the cornerstones of Public Health Service programs concerned with the hospital environment.

RESEARCH

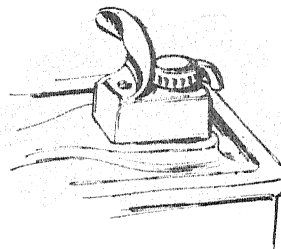

... leads to better patient care

Proper technique in changing bed linens reduces distribution of airborne pathogens.

Proper collection methods for solid wastes minimizes contamination during transportation.

Thorough and frequent cleaning of everyday items such as drinking fountain bubblers, eliminates a common source of organisms.

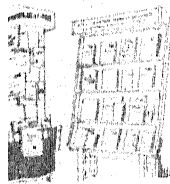

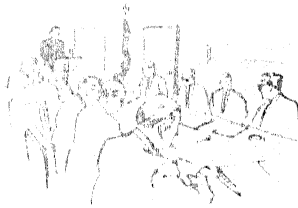

A primary focus for sponsoring these research programs is the Division of Hospital and Medical Facilities.

Education for hospital staff and health agency
 al constitutes a priority need in today's rap-
 idly changing medical care field. Better information
 and through research is delivered to public
 and medical care communities through edu-
 cational programs.

EDUCATION

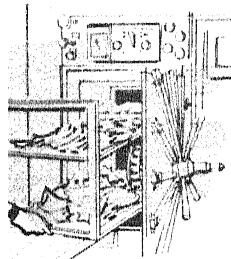

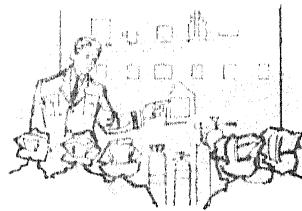

Leads to better patient care

Programs sponsored by
 Communicable Disease
 and the Division of
 Hospital and Medical Facilities
 provide new information

New concepts and tech-
 niques are reflected in the
 many publications routinely
 distributed to the medical care
 field.

Lectures on fire fight-
 ing and alarms help
 prevent confusion in emer-

Proper cleaning and wrap-
 ping of instruments and equip-
 ment help insure sterilization.

Primary focus for promotion of these educational pro-
 grams is the Division of Hospital and Medical Facilities.

Consultation services to hospitals and other medical care facilities on the environmental aspects of better patient care are available at local, State, and Federal levels.

CONSULTATION

. . . leads to better patient care

- Infection Control
- Decontamination and Sterilization
